**A.I.TAGS™ RFID SORTING GATE**

This is a quick action sorting gate system used to sort beef or dairy cattle for any reason. The system uses RFID technology, simply enter the animal's number into the system in advance of your time to begin sorting. Allow your animals to pass through the system and the gate will quickly open to sort every animal you want to sort.

**NOTE:**
The A.I.TAGS RFID SORTING GATE (**DOES NOT**) includes SMT HEAT DETECTION SOFTWARE. Use this system for natural breeding and save money. SMT SOFTWARE for heat detection **can be added** to this system later if desired.

**A.I.TAGS SMT™ DRAFTING SYSTEM**

This system uses A.I.TAGS SMT TAGS with the **chevron** image and the **COGNEX** camera with **Machine Vision Technology**! The **A.I.TAGS SMT SYSTEM** is the dairy producer's best friend when it comes to getting your cows pregnant. This system places your cows in front of you automatically when they are in their heat cycle. See our website for more information at [www.aitags.com](www.aitags.com)

**A.I.TAGS™ SMT SYSTEM with RFID SORTING**

This system gives you both units combined. Automatic heat detection and RFID technology that allows you the opportunity to use the system for all your needs.
Automatically detect heat and draft for insemination. Automatically sort with a drafting tag for vet checks. Or use the RFID technology to pre-program your system to automatically draft batches for any reason. You can sort to the left, to the right or pass on through.
